

6. South Wharf, Portland, Me.

PORTLAND CEMENT. — FREEMAN

and RICHARDSON have much pleasure in introducing to the trade the above superior CEMENT, being of uniform color and quality, and is in fact the best Portland Cement. It possesses extraordinary cementitious qualities, retards the action of frost and heat, and is more durable than any other Cement; does not become, turn green, or crack, combined with which its eminent hydrauic properties, making it at once the first Cement of the day for work where all the above qualities are requisite. It is manufactured on the only principle Portland Cement can be, and contrary to the statements put forth by the little scoundrel, who has been deceiving the public with his GREEK, King, at his Works, near the River Avon, and most of all parts of the kingdom per boat or rail, at a reduced price to the trade.
